Toscana Biomarkers - 2008 European Autoimmune Disease Diagnostics Excellence in Research Award

"Toscana Biomarkers are dedicated to the discovery and validation of novel diagnostic and prognostic tests for autoimmune diseases by implementing ground breaking research into the development of novel biomarker panels. The company strives to offer an overall analysis platform for a wide range of autoimmune diseases by providing versatile biomarker panels, extending the research capabilities and delivering unprecedented sensitivity."

"Exploiting the prospective applications of post-translational modifications (PTM's) associated with the pathogenesis of autoimmune diseases, Toscana Biomarkers aims at providing novel diagnostic solutions employing disease biomarkers. The researchers at Toscana Biomarkers are determined to explore the possibilities of adopting robust approaches in identifying novel diagnostic solutions within the autoimmune disease diagnostic space."
